GREEN GOLD GROUP
natural yachting

Hygienic and cleaning problems belong to yachts, as well as caravans to the daily challenge. A professional tank cleaning and water purification are the main measures to maintain quality of life in mobile home, caravan, boat and yacht. Likewise, the cleaning is today heavy, not environmentally friendly or through massive use of the "chemical club" performed.

We have the solution for you!

We offer you a holistic hygiene and cleaning system optimized for you, to offer a durable, natural and above all, scientifically proven solution against germs, bacteria and legionella on your yacht or caravan. Also, the cleaning by our products represents a uptodate, biological way, that is for humans, animals and the environment safely!

The use of our ANOGREEN products opens up new possibilities

in room or air disinfection
for drinking or service water sterilization
for cleaning indoors and outdoors
when cleaning your fenders, sails, sprayhoods, biminis and persennings

We can prove that by using ANOGREEN products you have a significant quality improvement as well as cost savings and a 100% environmental compatibility.

Green Gold Group sets new standards!

Nature makes it possible!

ANOGREEN TW

Natural microorganisms can be found in various concentrations worldwide retting into your water system, nest here and form colonies of different germs. biofouling forms on any water-wetted surface and is growing continuously. In this biofouling, legionella and others multiple germs are constantly growing and released into your drinking or service water.

ANOGREEN TW offers you a ready-to-use solution for drinking and service water disinfection. It is an ecological solution for spending directly into your water system, on your tank to sterilize them directly and to remove the biofouling permanently.
We remove germs immediately and safely and eliminate the cause.
With 0.1% ANOGREENTW your water is scientifically proven pure and 100% fit for human consumption.

ANOGREEN TW is added directly to your drinking water tank, that's how we make sure that the disinfecting effect occurs immediately and constantly wherever germs (such as legionella) find perfect conditions.

An important building block in the concept of the Green Gold Group, because that's the only way, we can make sure that your yacht or caravan is next to the highest quality. Next to the quality of drinking water also a significant saving in energy costs, and CO2 emissions exists. The energy savings can be explained by lowering the temperature caused by the hygienic of the waterpipe, so you don't have to heat up the water to kill the legionellas

ANOGREEN TW

- fast and easy to use
- danger-free (without safety measures)
- no hazardous substances, PH neutral
- energy savings of over 30%
- safe, practicable and sustainable
- no overdosing possible
- suitable for any drinking water system

ANOGREENTW meets and exceeds the purity requirements of DIN EN901 for drinking water disinfection.

ANOGREEN FOG

Another, ecologically and effective way to combat germs and mold in yachts and caravans and an essential building block in the overall concept of The Green Gold Group uses „cold fog".
Special nebulizers to grant the finest droplets brought into the rooms to be treated, so fine that no moisture is released, but a fine, standing cold fog. This "cold fogging" causes in addition to the disinfection an odor neutralization in shortest possible time.

The fog serves as a carrier and transports the biocide evenly into all hard to reach areas and thus closes all common disinfection gaps. This cold verne method with ANOGREEN FOG captures everything 100% because the fine mist is not immediately sinking, it remains in the desired application area. treatment gaps can be excluded as a source of error with this method.

During cold fogging with ANOGREEN FOG all furnishings can remain in the room, even a time-wasting cleaning process is not required.

ANOGREEN FOG is a ready-to-use solution that depends on the application can be diluted to 1: 6 with distilled water (1 part ANOGREEN FOG plus 6 parts water).
The misting is produced by a portable, cost-effective nebulizer (throwing distance: 5 to 10 meters), which can also be used with battery.

Since ANOGREEN FOG is not harmful to health, use without respiratory protection be performed. of course, the cleaned rooms can be used during the application constantly.

ANOGREEN FOG is not only used for acute problems. More and more charter companies can undergo basic disinfection and odor removal actively and preventively supported by our system.

without hydrogen peroxide, copper or silver ions, without aldehydes, dyes and fragrances, tested according to DGHM guidelines

ANOGREEN CLEAN

Another challenge in the yacht and caravan sector is with ANOGREEN CLEAN solved. We turn a disposable industrial product into an ecological cleaning medium. That's sustainability and ecology in its purest form.

ANOGREEN CLEAN consisting of over 90% sour whey. It is already ready to use and without added fragrances.
This unique cleaning medium is used in the interior, exterior as well as fenders, sails, sprayhoods, biminis and persennings cleaning. It‘s used with resounding success.
The whey, the basis of our biological cleanser, we get from happy cows from intact natural landscape of the alpine mountain region.
This ecological cleaner is created by the natural lactic acid, is gentle on the skin, ecological, regional, sustainable and ideal for allergy sufferers, pets and children suitable.
Sour whey offers an unusually high cleansing power due to its lactic acid and whey specific enzymes. (PH value of 3.2 - 3.5 in concentrate)

ANOGREEN CLEAN

provides cleanliness and purity in all applications
is dirt, grease and kalklösend
is easy to use
is gentle on equipment (corrosion, acid-free)
is gentle on humans (eyes, mucous membranes and hands)
does not pollute wastewater and is thus gentle on the environment
with natural germ reduction
absolutely safe for humans, animals and the environment
dermatologically tested

- without the addition of preservatives
- without alcohol and formaldehyde
- suitable for allergy sufferers
- without heat treatment
